Children learning.

Leaves changing.

God painting the  
earth with the  
colors of fall.

## *Reflections*

Fall has arrived; though it is hardly noticeable with our current afternoon temperatures, it is noticeable in the shorter daylight hours. The mornings are much cooler, so please remember to send a sweatshirt or light jacket with your child. It is a pleasure to walk down the hallways and observe the students engaged in various learning activities or attentively listening to their teacher explain the lesson. The elementary teachers are gearing up for "Mining Month" in October in kindergarten through 5th grades with many fun learning activities and group projects planned. The middle school is in the midst of student council elections, practicing the democratic process that this country was founded upon. They will present their viewpoints in their speeches before the student body on Monday at 2:15. They will also be using their creative writing skills in the upcoming Elks writing contest in November; hoping to better than last year's winning entries. As always, we encourage parent involvement in their children's schooling; take some time and volunteer in the classroom - make memories your children won't forget.

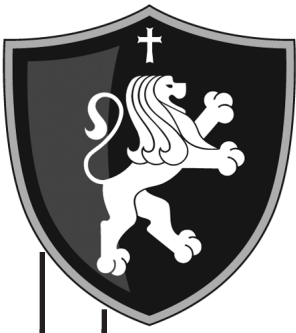

*. . . and parents are the pride of their children.*
